Controlled Chemical Microexfoliation

INNO-EXFO® offers skin care professionals a complete system of chemical peels that combine a variety of acids. Different peels address individual skin pathologies and skincare needs.

The active ingredients of each peel will address both upper and middle layers of the skin in order to achieve the optimum result: renewed and revitalised skin.

INNO-EXFO® improves the appearance of the skin, minimizes signs of ageing, brightens, reduces hyper pigmentation and various other skin abnormalities.

Each of our products provides:

- Effective results.
- Quality and safety.
- Good tolerance.
- Minimal irritation.
- Easy application.

Smart GPS® (Guidance Performance System)
An exclusive technology registered by
INNOAESTHETICS

Smart GPS®: A state-of-the-art technology

INNOAESTHETICS has added a significant innovation to its INNO-EXFO® Chemical peel line: Smart GPS®.

A state-of-the-art technology that achieves better penetration of the actives through the stratum corneum. By imitating the physical-chemical characteristics of the surface of the epidermis, Smart GPS® overcomes the skin's resistance without damaging it. In addition, Smart GPS®

conveys and delivers the ingredients into specific group of cells where they have the maximum therapeutic effect. It also ensures that they remain stable and protects them from degradation.

All the INNO-EXFO® peels incorporate Smart GPS®.

LIGHTENING

Vit A 5%

Integral dermoepidermal restructuring treatment for skin aging and spots.

INDICATIONS

Indications

- Moderate photoaging associated with mild pigmentations.
- Inflammatory acne.

Active Ingredients

Vitamin A, Lactic Acid, Salicylic Acid, Arbutin, Kojic Acid, Phytic Acid and Smart GPS®.

Mechanism of Action

Unique exfoliating treatment using vitamin A as therapeutic element against photoaging on levels I and II associated with mild pigmentations.

Homecare Treatments

- 1. INNO-EPIGEN® Pigment Defense**
Prevents and attenuates hyperpigmentation. Use in the mornings for 2-3 months.
- 2. INNO-EPIGEN® Urban Day Cream SPF 20**
Day cream that protects your skin from external aggressions.

- 3. INNO-DERMA® Dark Spot Eraser [DSE Plus+] 24H Cream**
Lightening treatment. Apply at night for 2-3 months.

MCA 35

Biorevitalizing chemical resurfacing.

35% NO FROST

INDICATIONS

Indications

- Hypotonic and atrophic skin.
- Elastosis on face, neck and neckline.
- Adjuvant for hyperpigmentation treatments.

Active Ingredients

CA, Salicylic Acid, Arbutin and Smart GPS®.

Mechanism of Action

The synergy of its ingredients achieves a biorevitalizing and redensifying effect on the dermal and epidermal layers, thus attenuating photoaging signs and improving elastosis and skin atrophy.

Homecare treatments

1. INNO-EPIGEN® Age Perfection Serum

Anti-aging concentrated serum.
Apply in the mornings for 2-3 months.

2. INNO-EPIGEN® Urban Day Cream SPF20

Day cream that protects your skin from external aggressions.

3. INNO-DERMA® Age Rescue C 24H Cream

Intense treatment for skin rejuvenation.
Use at night for 2-3 months.

ULTIMATE EYE CORRECTOR **Vit A 3%**

Powerful periocular rejuvenation.

INDICATIONS

Indications

- Periorbital photoaging.
- Crow's feet.
- Eye lifting effect.

Active Ingredients

Vitamin A, Lactobionic Acid, Mandelic Acid, Salicylic Acid and Smart GPS®.

Mechanism of Action

Repairing and revitalizing treatment for eye contour based on A vitamin and Polyhydroxy acids that improves fine lines around the eyes and evens the skin tone.

Homecare treatments

1. INNO-EPIGEN® Antiox Serum

Antioxidant and detoxifying serum.

Apply in the morning for 2-3 months.

2. INNO-DERMA® Eye Revitalizer

Powerful product to treat affections on palpebral, peri-palpebral and periorbital regions.

Apply day and night for 2-3 months.

SKIN RECOVERY SA 30%

Intensive solution for oily and acne skin conditions.

INDICATIONS

Indications

- Acne with comedones.
- Oily skin / sebum excess.
- Rough skin texture.
- Folliculitis.
- Red stretch marks.

Active Ingredients

Salicylic Acid, Mandelic Acid, Resorcinol, Azelaic Acid, Retinol and Smart GPS®.

Mechanism of Action

Combination of acids with powerful keratolytic and anti-microbial action. Promotes dermal-epidermal restructuring.

Homecare treatments

1. INNO-EPIGEN® Purifying Serum

Regulates sebum secretion, shrinks pores and prevent breakouts. Use for 2-3 months.

2. INNO-DERMA® β Purifier 24H Cream

Restores skin texture and regulates sebum secretion. Apply every night on for face 2-3 months.

MANDELAGE

MA 45%

Moderate skin aging
and superficial pigmentations.

INDICATIONS

Indications

- Skin photoaging.
- Superficial dyschromia.
- Mild inflammatory acne.

Active Ingredients

Mandelic Acid, Lipoic Acid, Vitamin A and Smart GPS®.

Mechanism of Action

Mandelic acid rapidly but gently renews the epidermis, attenuating fine lines and improving skin texture, firmness and brightness. Moreover, this ingredient effectively lowers sebum levels.

Homecare treatments

1. INNO-EPIGEN® Antiox Serum

Antioxidant and detoxifying serum.

Apply in the morning for 2-3 months.

2. INNO-EPIGEN® Urban Day Cream SPF20

Day cream that protects your skin from external aggressions.

3. NNO-DERMA® Dark Spot Eraser [DSE Plus+] 24H Cream

Lightening treatment. Apply every night for 2-3 months.

BIO C

Epidermal antioxidation
effect for glowing skin.

Vit C 15%

INDICATIONS

Indications®

- Photoaging prevention.
- Sensitive skin.
- To maintain the effects of previous peels.

Active Ingredients

Solution 1: Lactobionic Acid, Mandelic Acid, Lactic Acid, Glycolic Acid and Smart GPS®.

Solution 2: Ascorbic Acid, Silanol, Hyaluronic Acid, Vitamin A and Smart GPS®.

Mechanism of Action

Combined action of different gentle acids to boost epidermal hydration, reinforced by the impermeable film of topical hyaluronic acid and the antioxidant and keratinocyte-protective effects of vitamin C. Improves skin elasticity and firmness and boosts skin glow.

Homecare treatments

1. INNO-EPIGEN® Antiox Serum

Antioxidant and detoxifying serum.

Apply in the morning for 2-3 months.

2. INNO-EPIGEN® Urban Day Cream SPF20

Day cream that protects your skin from external aggressions.

3. INNO-DERMA® Age Rescue C 24H Cream

Intense treatment for skin rejuvenation.

Use at night for 2-3 months.

GLYCO-AGE

GA 50%

Extreme hydration by stratum corneum renewal.

INDICATIONS

Indications

- Seborrhic skin.
- Open pores.
- Dry skin.

Active Ingredients

Glycolic Acid, Mandelic Acid, Lactic Acid, Vitamin A and Smart GPS®.

Mechanism of Action

The acids in the formula stimulate epidermal cell renewal, reduce the thickness of the stratum corneum and thicken the basal cell layer which leads to an improvement in the texture and appearance of the skin, reducing open pores and boosting skin hydration.

Homecare treatments

1. INNO-EPIGEN® Purifying Serum

Regulates sebum secretion, shrinks pores and prevent breakouts. Use for 2-3 months.

2. INNO-DERMA® β Purifier 24H Cream

Restores skin texture and regulates sebum secretion. Apply every night on for face 2-3 months.

T.C.AGE

Dermoepidermal reconstruction for skin rejuvenation.

TCA 15%

INDICATIONS

Indications

- Moderate Photoaging.
- Acne scars.
- Atrophic striae (white stretch marks).

Active Ingredients

TCA, Salicylic Acid and Smart GPS®.

Mechanism of Action

Intense coagulant action on albumins (frosting), manifested by caustic effects. Strong keratolytic activity allowing for powerful cell renewal of the epidermis and a skin tightening effect. Attenuates fine lines and wrinkles, boosts skin glow and helps to reduce scars and white stretch marks.

Homecare treatments

1. INNO-EPIGEN® Age Perfection Serum

Anti-aging concentrated serum.
Apply in the mornings for 2-3 months.

2. INNO-EPIGEN® Urban Day Cream SPF20

Day cream that protects your skin from external aggressions.

3. INNO-DERMA® Age Rescue C 24H Cream

Step 1 from 5 to 10 min. Then, rinse off with water.	Not required.	Apply INNO-EXFO® Bio C Step 2 and do not remove.	Perform 5 sessions with intervals of 7 or 15 days.	Every cycle can be repeated every 4 or 6 months.
From 3 to 5 minutes.	Spray INNO-EXFO® Neutralizer on the skin and rinse off with water.	Apply INNO-DERMA® Skin Repair or INNO-DERMA® Refresh Mask.	Perform 4 sessions at intervals of 7 or 15 days.	Every cycle can be repeated every 4 or 6 months.
From 3 to 5 minutes.	Not required.	Apply INNO-DERMA® Skin Repair and massage until absorbed.	Perform 3 treatment sessions at intervals of 15 days.	Every cycle can be repeated every 6 or 8 months.

ADJUVANTS

DEGREASING SOLUTION

Adjuvant solution to degrease and disinfect the skin before an aesthetic procedure.

Active Ingredients

Isopropyl alcohol, Aqua.

Mechanism of Action

Degreasing solution has been specially designed to remove sebum and deeply cleanse and disinfect the skin before any INNO-EXFO® treatment. It effectively prepares the skin for the proper penetration of the active ingredients.

Application Technique

Apply on the skin with a cotton pad and rub to remove all dirt.

Presentation

100ml

pH of the product

5.0 - 7.0

ADJUVANTS

NEUTRALIZER

Soft solution to buffer and control the effects of acids on the skin.

**Active Ingredients**

Aqua, Glycerine, Sodium Bicarbonate, Phenoxyethanol, Benzyl Alcohol, Potassium Sorbate, Tocopherol, Ammonium Lactate, Propylene Glycol, Chamomilla Recutita Extract y Smart GPS®.

Mechanism of Action

Its ingredients work in synergy to control the reaction of acids on the skin and neutralize the alpha hydroxy acids.

Application Technique

Spray generously on the treated area avoiding the eye contour immediately before rinsing off the peel. Remove the neutralizer and the peel with plenty of cold water.
